Project objective

Build one calm place where groups can **track money, plan together, and communicate** without losing context.

Transparent ledgers

Record BDT expenses with payers, participants, notes, and settlement context.

Collaborative planning

Connect budgets, polls, events, and recurring commitments to the group.

Real-time alignment

Keep conversations and shared financial updates synchronized through live interactions.

Personal dashboard

02 / 10

A live financial snapshot that turns shared records into **clear next steps**.

Live BDT totals

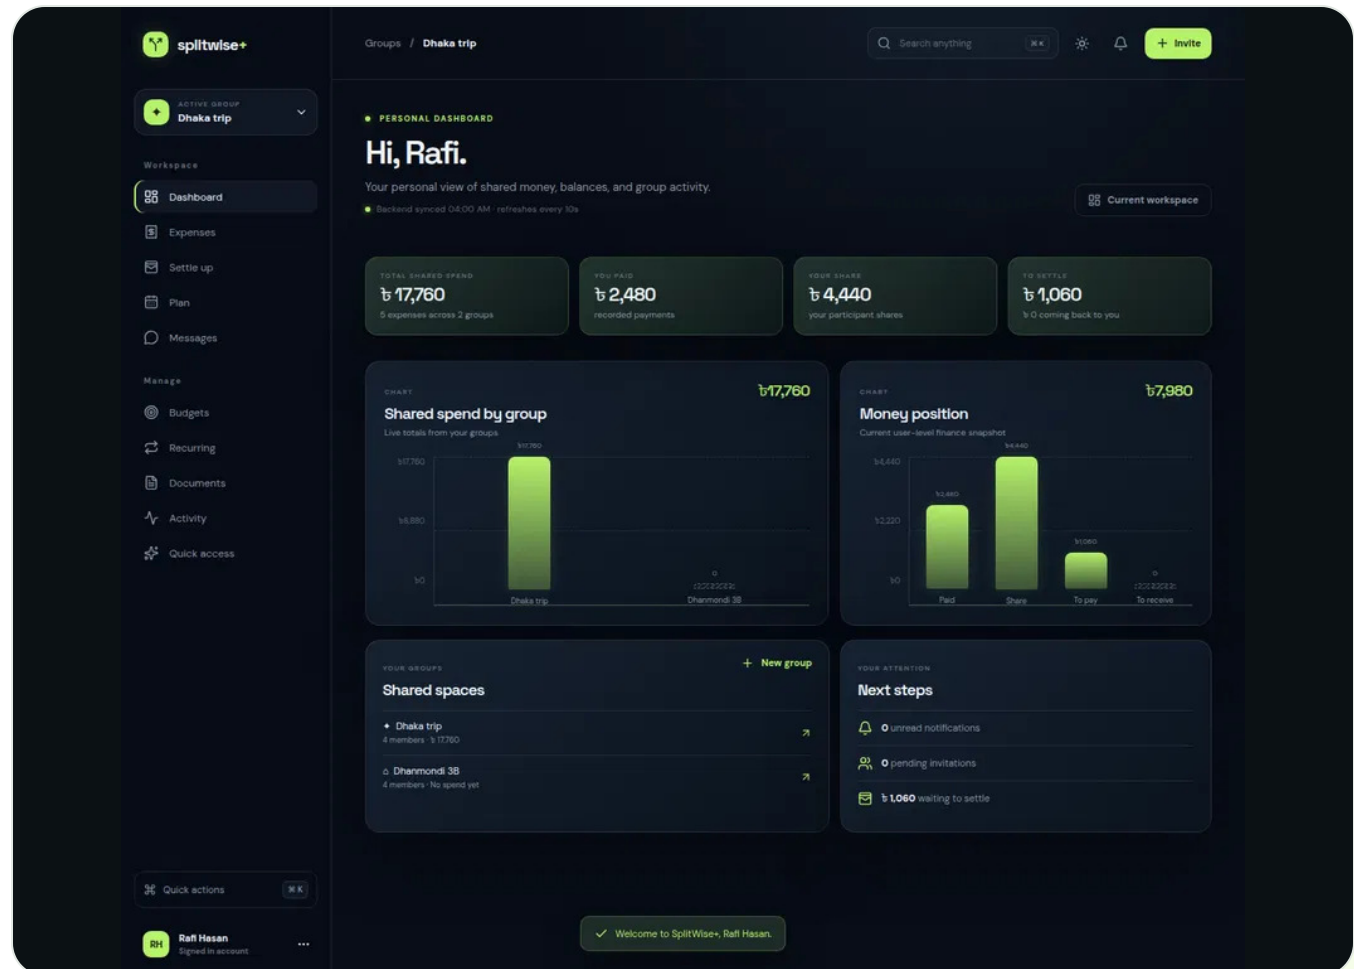

Aggregates spend, paid amount, participant share, and settlement position from the backend.

Visible charts

Shows shared spend by group and money position with readable axes and zero-state guidance.

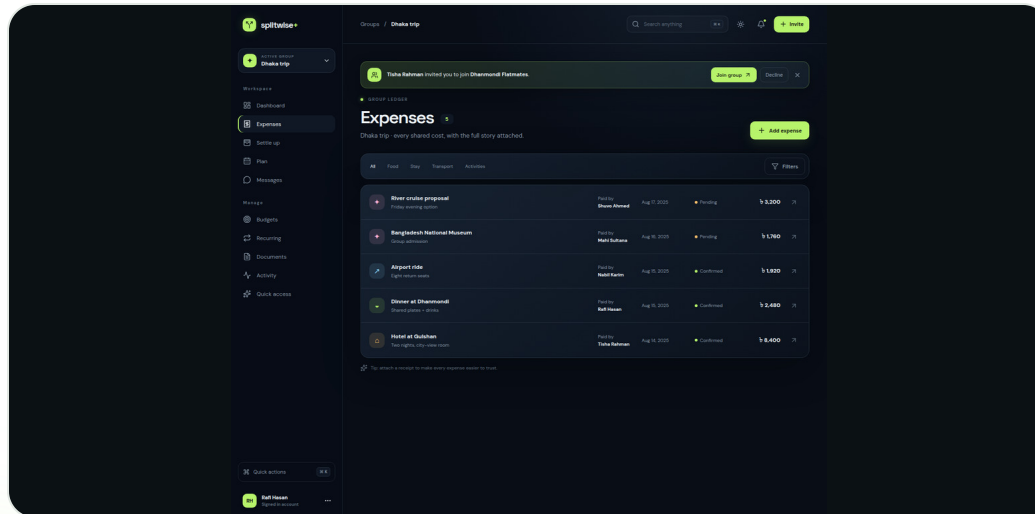

Attention cues

Surfaces pending invitations, unread notifications, and amounts waiting to settle.

Group ledger & expenses

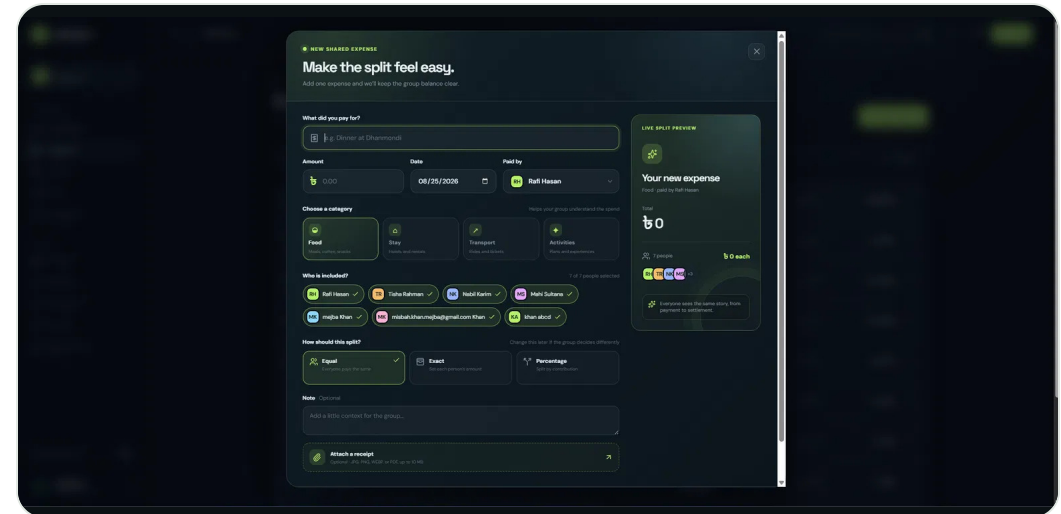

SHARED EXPENSE LEDGER

Comprehensive tracking

Log shared costs with exact BDT amounts, payer details, and precise participant splits.

NEW EXPENSE CREATION

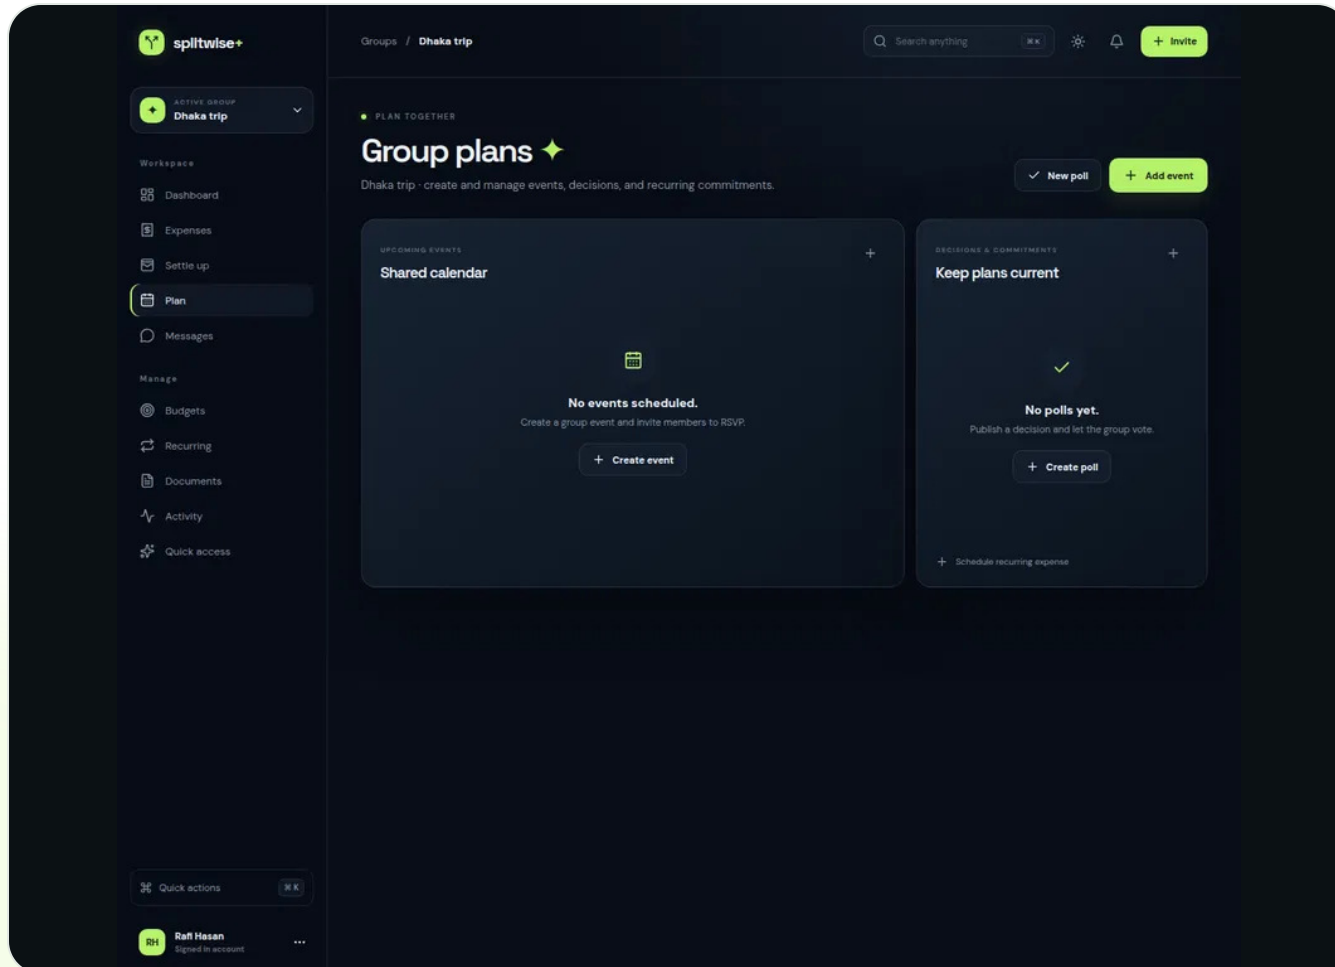

Smart categorization

Filter transactions by categories like Food, Stay, and Transport for clear spending insights.

Context & receipts

Attach verifiable receipts and detailed notes to maintain a transparent financial history.

Collaborative planning

Connect future decisions to **financial commitments.**

Shared calendar

Create group events and track member RSVPs in one centralized view.

Group decisions

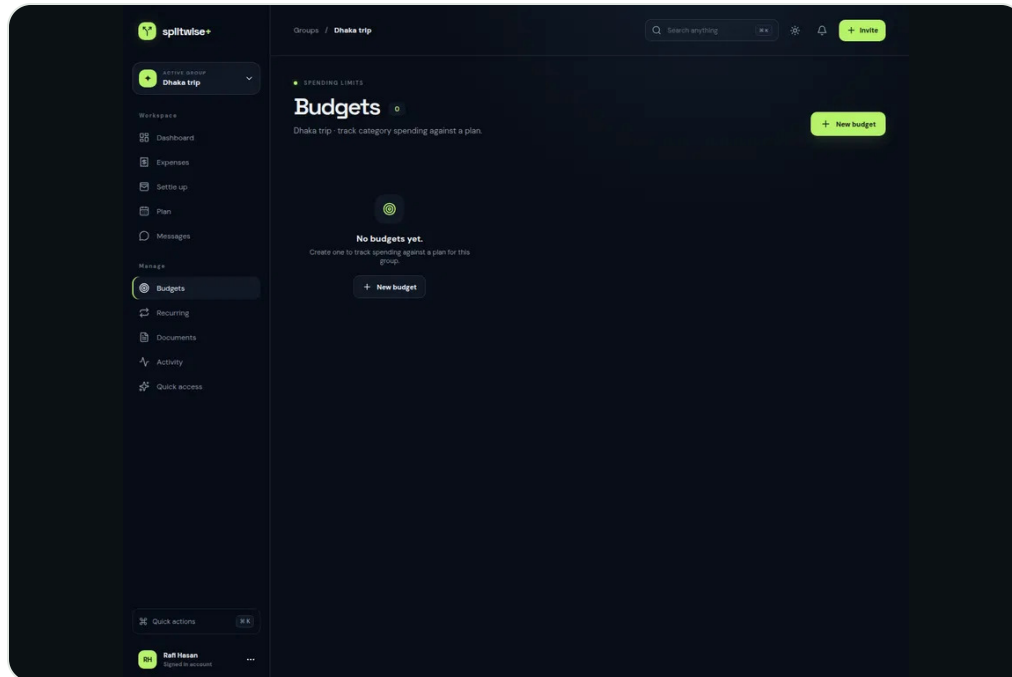

Publish polls to align on choices and gather consensus before spending.

Truthful empty states

Clear guidance and functional creation controls when no plans exist.

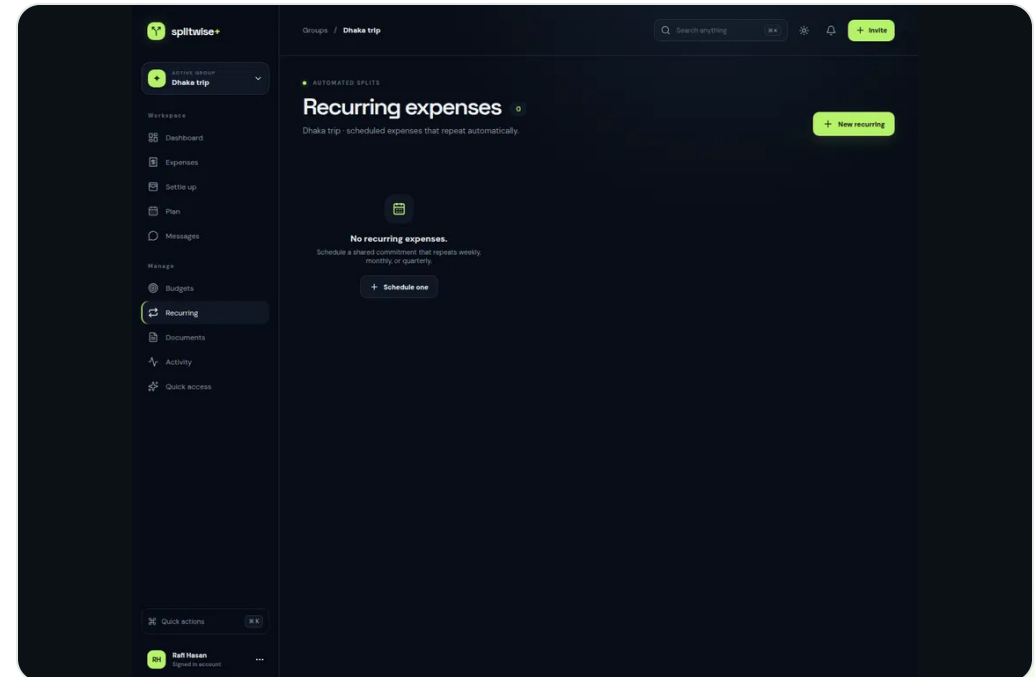

Budgets & Recurring Expenses

06 / 10

Category Budgets

Set spending limits and track category-specific expenses against a planned group budget to maintain financial alignment.

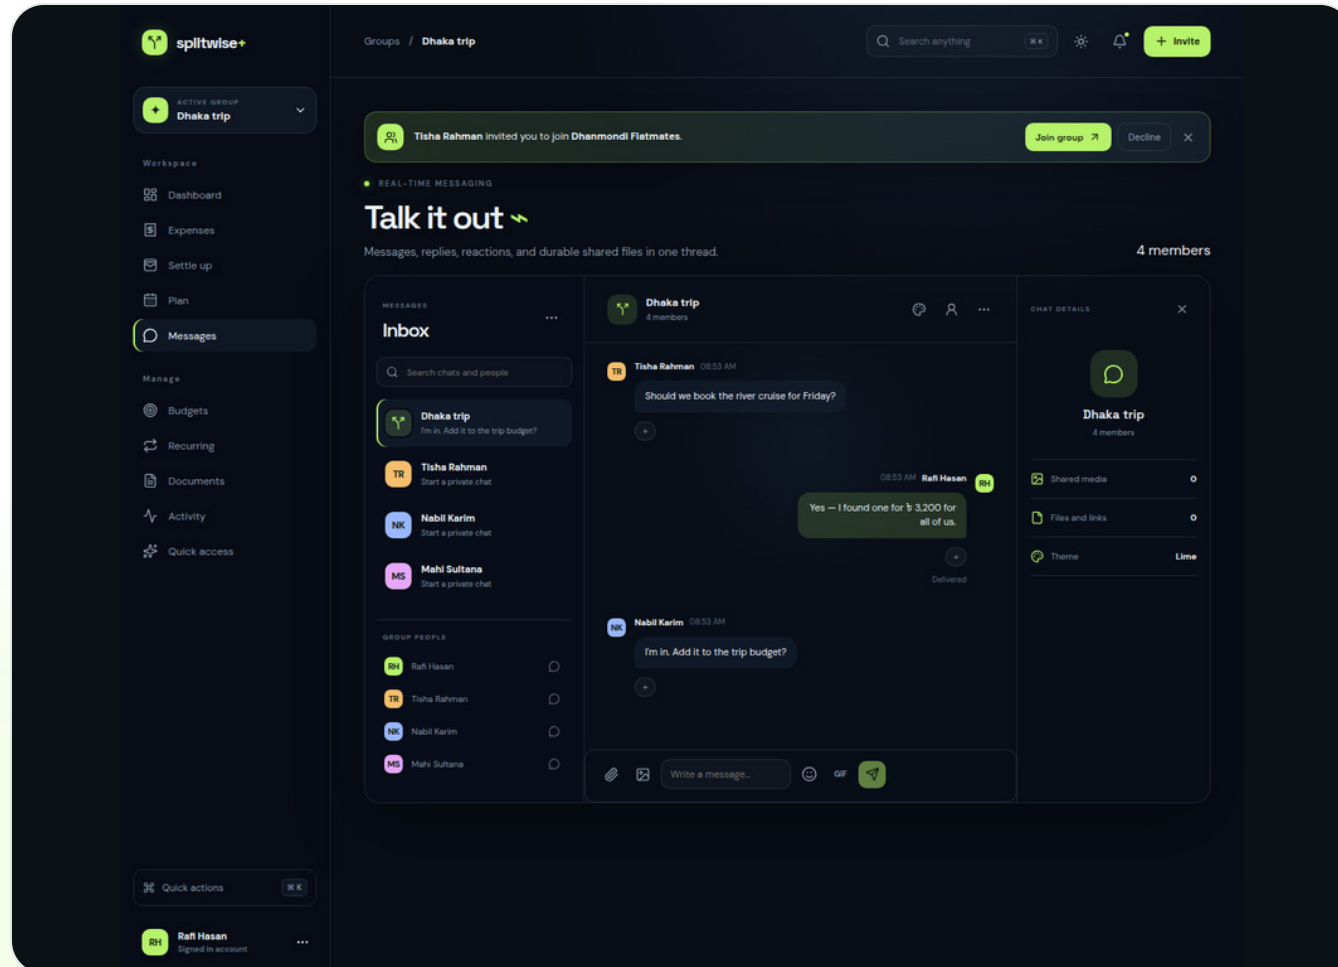

Automated Commitments

Schedule shared expenses that repeat weekly, monthly, or quarterly for predictable costs like rent and subscriptions.

Real-Time Messaging

07 / 10

Keep financial decisions and group conversations in the **same shared context.**

Chat integration

Instant message delivery, live reactions, and real-time presence updates.

Unified inbox

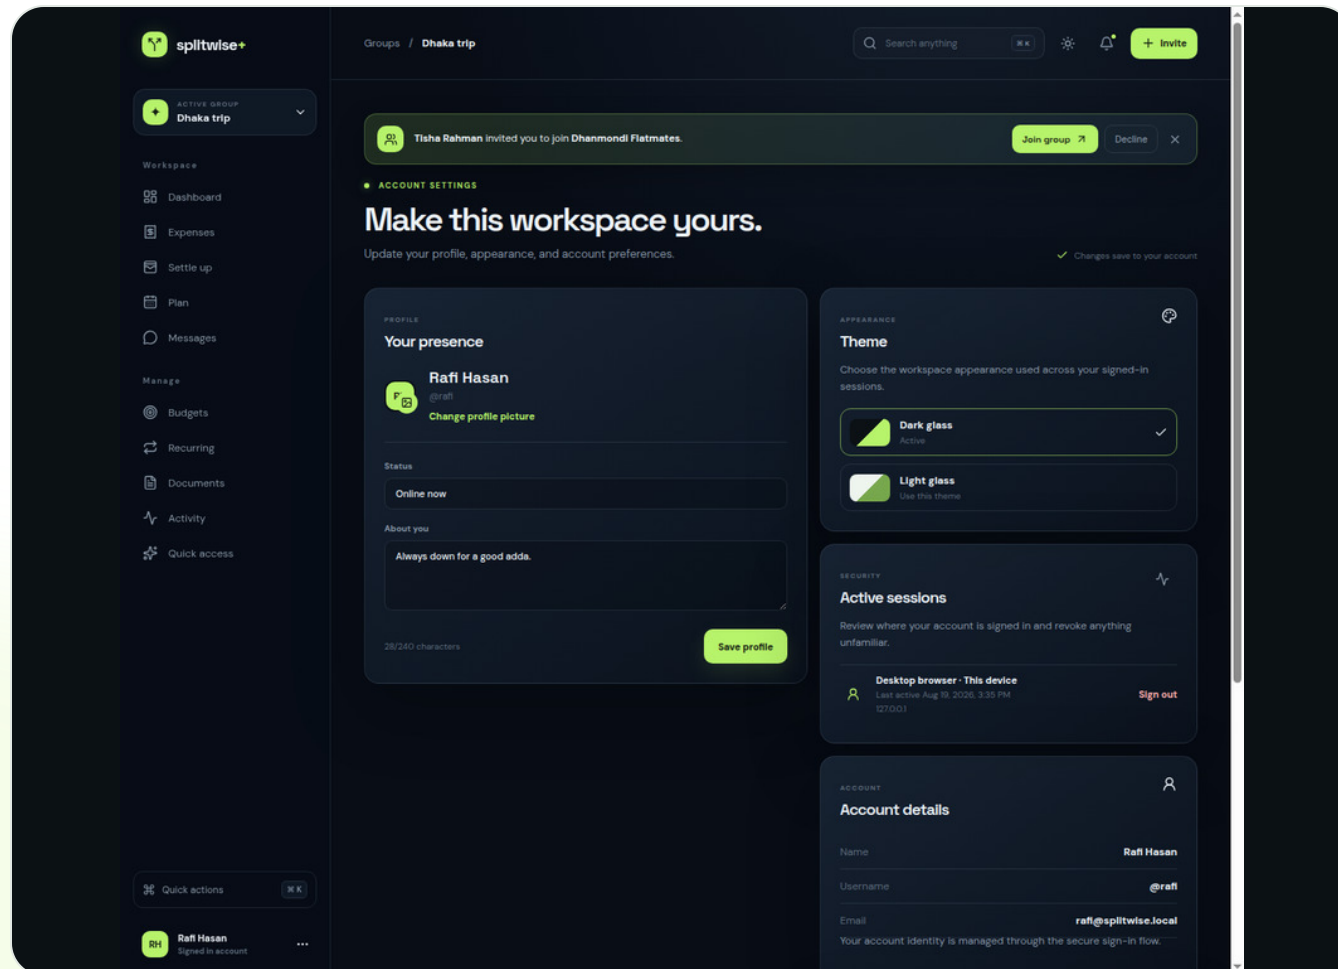

Navigate effortlessly between group threads and private direct messages from a single interface.

Media sharing

Attach documents, photos, and videos directly to the conversation to preserve context.

Account & Security

08 / 10

Manage your identity, appearance, and **active sessions** in one secure place.

Profile & Theme

Update personal presence, upload avatars, and toggle workspace themes.

Session Control

Monitor active devices and securely revoke unfamiliar sessions remotely.

Audit Trail

Track account activity, sign-ins, and security events in a private log.

Technology Stack

Frontend

- **React 19** & TypeScript
- **Vite** Build Tool
- **Native CSS** (Liquid-glass)
- **Lucide React** Icons

Backend

- **Django 5** Framework
- **REST Framework** APIs
- **JWT** Authentication

Infrastructure

- **GitHub** Version Control
- **SQLite / PostgreSQL**
- **REST API** Architecture
